✓ TC-56	 Verify that registration fails when an existing username is entered.	Phuong Nghi Pham	7/18/2026, 4:13 PM
TEST CASE DETAILS			
PRECONDITION The username already exists in the system.			
STEPS			
1	 Enter an existing username.	 Existing username is entered.	
2	 Complete all remaining required fields.	 Other fields accept valid values.	
3	 Click Register.	 Registration is rejected and an error message indicating that the username already exists is displayed.	

✗ TC-57	 Verify that the Phone Number field does not accept alphabetic characters during registration.	Phuong Nghi Pham	7/18/2026, 4:22 PM
TEST CASE DETAILS			
PRECONDITION User is on the Register page.			
STEPS			
1	 Enter alphabetic characters (e.g., abcdef) into the Phone Number field.	 Alphabetic characters are entered into the Phone Number field.	
2	 Fill in all remaining required fields with valid data.	 Other required fields accept valid values.	
3	 Click the Register button.	 Registration is rejected, and an appropriate validation message is displayed indicating that the Phone Number field contains invalid input.	

RESULT COMMENTS & ATTACHMENTS	AUTHOR	COMMENT DATE
 The application allows users to register successfully even when entering alphabetic characters into the "Phone Number" field, instead of rejecting the input or showing a validation error.	Phuong Nghi Pham	7/18/2026, 4:22 PM
